Summary

Dynamic Front-End Web Developer with 7 years of experience in refining and delivering web application features using modern Front-end frameworks and TypeScript. Coordinated ADA-compliant feature developments, enhancing user accessibility and interactivity, while migrating legacy systems to improve code efficiency—expertise in scalable, high-quality UI solutions through innovative use of TypeScript and modern front-end technologies and solutions.

Experience

BahrCode (Remote)

Front-End Web Developer

Rexburg, Idaho

August 2018 - January 2025

- Coordinated with project stakeholders during sprint cycles to refine and deliver web application features using KnockoutJS, TypeScript, and SCSS in alignment with client specifications.
- Collaborated across front-end and back-end layers to identify inconsistencies in code, leveraging debugging expertise and local environment knowledge for deployment readiness on IIS-backed systems in a .NET ecosystem.
- Adopted ADA compliance measures in front-end development by incorporating HTML accessibility attributes and utilizing native browser assistive technologies to adhere to client accessibility requirements.
- Integrated complex business logic into front-end components with TypeScript and KnockoutJS, ensuring seamless interaction between user interfaces and underlying application architecture.
- Refined UI workflows by implementing reusable KnockoutJS components, streamlining front-end architecture for scalable feature development, maintainability, and cross-browser compatibility.
- Enhanced front-end efficiency by migrating legacy JavaScript modules to TypeScript, reducing runtime errors and improving code maintainability across a team of 4 developers with a focus on scalability, performance, and adoption.

PolicyTech at Navex Global

Client Support Technician

Rexburg, Idaho

February 2017 - August 2018

- Delivered technical support to hundreds of clients, resolving software and installation issues for a .NET-based web application.
- Managed and updated a daily backlog of client cases, ensuring timely resolution and client satisfaction.
- Resolved technical incidents in production infrastructure by working with IIS and SQL Server toolsets, facilitating seamless application deployment and operation.
- Analyzed client workflows and integrated targeted solutions, using application knowledge to streamline user adoption.
- Executed SQL queries to diagnose system issues and provide insights, facilitating customer solutions.
- Diagnosed and resolved SAML configuration issues involving vendors such as Okta, Azure, and ADFS.
- Troubleshoot Active Directory authentication and user provisioning, including filter string and flat-file synchronization, to integrate software with customer user bases.

9throot Web Marketing

Junior Web Developer

Saratoga Springs, Utah

July 2016 - February 2017

- Created responsive front-end components in a LAMP environment by coding with HTML, CSS, and JavaScript to address project requirements and device compatibility.
- Constructed PHP modules in a LAMP environment, applying web development best practices and maintaining uniform code quality standards.
- Assisted in translating stakeholder requirements into web assets by aligning design inputs with back-end development, leveraging a LAMP stack.

Education

Web Developer Bootcamp

DevMountain

Orem, Utah

2016

Skills

Technical: HTML5, CSS3, SASS, SCSS, JavaScript, TypeScript, jQuery, Bootstrap, Tailwind, RESTful APIs, Git, Vite, NPM, Webpack, Babel, Jest, AWS S3

React: React.js, Next.js, Redux, Context
